

Definition of Low and Moderate Income Neighborhoods

2010 Neighborhood Small Grants Program

A limited number of dollars are available to the Neighborhood Small Grants Program. For this reason, the program partners — the City of Knoxville and the East Tennessee Foundation — wish to concentrate these dollars in the areas of greatest need, i.e. low- to moderate-income neighborhoods.

To identify eligible neighborhoods, the City of Knoxville uses the most reliable and accessible income data available at a neighborhood level — the household income statistics gathered by the U.S. Census Bureau in 1999 and reported in the 2000 census.

The smallest area for which income data is available is the block group. A block group may consist of dozens of blocks. A census tract is composed of one or more block groups.

For the Neighborhoods Small Grants Program in 2010, a low- or moderate-income neighborhood is defined as one which overlaps a block group whose 1999 median income is equal to or less than \$35,581 — which is 95% of the 1999 median household income of \$37,454 in Knox County.

Example #1: The Green Gardens neighborhood is located in, includes or overlaps Block Group 1 in Census Tract 101. The median household income for Block Group 1 in 1999 was \$34,000. Since this is less than \$35,581, Green Gardens qualifies as a low- to moderate-income neighborhood for purposes of the NSG Program.

Example #2: The Red Gardens neighborhood is covered by block groups 2 and 3, also in Census Tract 101. The 1999 median household income for both blocks groups was over \$35,581, and therefore Red Gardens is not eligible to apply for a neighborhood small grant in 2010.

Exception: If a neighborhood does not qualify on the basis of block group income, but believes it IS low or moderate income—or it has a project which targets and benefits a low-income area of a more affluent neighborhood—then the neighborhood may suggest other means to establish eligibility. ETF reserves the right to judge such applications on a case-by-case basis.

How to Determine if Your Neighborhood is Eligible

You may call the Office of Neighborhoods at 215-3232 to find out if your neighborhood is a designated low or moderate income neighborhood.

Or you can research this yourself by taking the following steps:

1. On the Web, go to www.factfinder.census.gov
2. In the left-hand column, in the Address Search section, click on “street address”.
3. On the Address Search Screen:
 - Select the Address Search tab and Census 2000.
 - Enter your street address.
 - Enter Knoxville Tennessee and your zip code.
 - Click GO.

(OVER)

4. Your census tract and block group will appear. (To see a map of your block group, highlight “block group” and click “Map It”.) Note that your neighborhood may include more than one block group.

5. Once you know the relevant census tract and block group number(s), refer to the table below. These are the census tracts (CT) and block groups (BG) whose 1999 median household income (HH Income) is equal to or below 95% of Knox County’s 1999 median income.

<u>CT</u>	<u>BG</u>	<u>HH Income</u>	<u>CT</u>	<u>BG</u>	<u>HH Income</u>	<u>CT</u>	<u>BG</u>	<u>HH Income</u>
